

CONTENTS VALUATION FORM

It's all too easy to underestimate the real value of the fixtures and fittings and personal items that make up a home. Indeed, it's believed that some people fall as much as 30% short when they assess the value of their possessions.

By using this form you can calculate the current value of your home's contents, including some of your most valuable possessions.

This information will not only be extremely useful if you have to make a claim, it can also come in handy when you next need to renew your insurance.

HALL
